

Update to recommendations made in the 2010 Annual Report of the Auditor General of Ontario

In 2010 Trillium Gift of Life Network (TGLN) welcomed recommendations from the Auditor General to further elevate Ontario's organ and tissue donation performance. Today's update highlights the significant progress that has been made in enhancing policies, procedures and systems to reduce wait times for organs, thus saving lives and improving patients' quality of life. We are proud of these accomplishments, and in collaboration with our partners, are committed to continuing this momentum, moving forward and working to save and enhance more lives through organ and tissue donation and transplantation in Ontario.

Every Ontarian can offer hope to those waiting for a lifesaving transplant by registering their consent to organ and tissue donation. One donor can save up to eight lives and enhance as many as 75 others. Please visit www.BeADonor.ca and take two minutes to check your status or register your consent. A signed donor card does not mean you are registered.

For more details on the status of each of the recommendations, please see [2012 Annual Report, Office of the Auditor General of Ontario](#).
