

## **Cost Recovery Considerations\***

Cost recovery considerations apply to both research requests for data and research requests for specimens.

To ensure TGLN's ability to support its research partners is sustainable, a cost recovery process is in place to recoup incremental costs. The cost recovery process was developed in accordance with the following principles: simple to administer; fair, reasonable, and transparent.

TGLN will charge a one-time cost recovery fee of \$600 for all requests. If specimens are required, there will be additional fees to cover the cost of surgical supplies required to recover the specimens. At the time of receiving a request for data/specimens for research, TGLN will inform Requestors of the estimated fee(s) associated with their request. The final amount will be determined once the request has been finalized.

If you have any questions about the cost recovery model please contact the Program Manager, Research at [Research@GiftOfLife.ca](mailto:Research@GiftOfLife.ca).

\*The revised fee structure is effective as of 2019-04-01
